

Our Commitment to Engagement

In taking forward the work of the Humber, Coast and Vale Sustainability and Transformation Partnership (STP), we will:

- Be open and transparent in our processes and explain why sometimes there is information we can't share.
- Be honest about the challenges we face and the constraints we must work within.
- Be willing to listen.
- Encourage patients and the public to work with us to do things differently.
- Seek out lesser heard voices and offer support where required to enable people to participate.
- Empower staff to share their ideas and to try out new things.
- Admit when we get things wrong and be willing to try a new approach.
